

Manufacturing Engineering is probably the most controversial field of engineering, starting from the definition –which can not be found in many dictionaries- and ending with the domains which can be considered part of this field.

The International Journal for Manufacturing Science and Production reports the latest developments and original applications, theoretical research and case studies in the field of manufacturing. This new quarterly journal will be of special interest to mechanical and manufacturing engineers, production and manufacturing managers, strategic planners, government officials with responsibilities for manufacturing, researchers and students in manufacturing engineering.

This journal will cover the following topics:

Manufacturing Technology, Manufacturing Processes (turning, milling, drilling, grinding, lapping etc.), Design of Manufacturing Processes and Systems, Factory Automation, Flexible Manufacturing Systems and Management and Production Planning.

Quarterly Published.

2000 subscription \$160.00 US dollars (including airmail).

ISSN 1524-1548

NOTES TO AUTHORS

Manuscripts should be submitted directly to the editors.

Please include a short abstract.

Manuscripts should be typed double-spaced in double column on letter paper (8.5 X 11 inches), having at least a ¾ of an inch of margin. Figures and tables can be included in the text, in the order desired, or be sent separately indicating its proper placement on the text. Photographs should be submitted in duplicate. Please prepare these as glossy black and white copies with proper identification in the back.

Articles may be submitted as 3 hard copies and a soft copy on Compact Disc, Floppy Disc or Iomega Zip Disk 100 Mb, using Microsoft Word for Windows version 97 or earlier. Font type should be 12 pts. Times New Roman or similar.

References should be indicated in the text by consecutive members in slashes, as /1/,/2/, etc. The list of references should be typed in numerical order at the end of the text as follows:

1. Stremler F.G., *Introduction to Communication Systems*, Addison-Wesley Publishing Co., New York, 1990.
2. Holmes M., Trumper D., Hocken R., Atomic-scale precision motion control stage (the Angstrom Stage) CIRP Annals 1995.

All accepted manuscripts are subjected to editing.
